## FOLLOW UP CHECKLIST

Following the steps provided in the "Bed Bugs Pre-Treatment" preparation letter is essential to ensure the complete control of any bed bug infestations. It may take several weeks to gain effective control of bed bugs, so your patience and help are greatly appreciated.

- Aardvark recommends that you immediately put any bed bug covers that might have been purchased over all mattresses and box springs. This will keep any bugs that are now in the mattress and box springs there. If there are none there, they will not be able to infest your bed.
- Vacuum all carpeting and floors daily, removing and throwing the vacuum bag away each time. Be sure to vacuum along baseboards where carpets tuck under.
- Vacuum all mattresses and box springs as well as any living room furniture. Pay special attention to all seams and folds.
- When removing items that were packed away for the treatment, take extra care not to re-introduce bed bugs to your home.
- Any pillows small enough to be placed into our dryer should be dried on HIGH HEAT for a minimum of 30 minutes. The same applies to stuffed animals. Make certain they won't be affected by the high heat of the dry.
- Aardvark prohibits the use of outside chemicals, paints, water-based products, powders, or bed bug bombs that would interfere with our professional grade chemical. Use of such will dramatically alter the result of treatment and will automatically incur additional costs to the homeowner for future treatments.

The responsibility lies on the homeowner to contact our office 14 days following the second treatment to schedule a 2 week follow up inspection. If Aardvark has not heard anything within 30 days, we will assume that the bed bug infestation has been rid of and that no further actions need to be taken.
